PROJECTS

● ETP-Every Thing is Possible | Node.js, Express.js, React.js, MongoDB, AWS Jan 2025

Designed a digital learning platform for intuitive and inclusive education.

Implemented React state management and reusable components.

Created backend services for user authentication, progress tracking, and course management.

Boosted user engagement by optimizing load time and mobile responsiveness. Git hub repository - github.com/Saks34/ETP---Everything-is-Possible

● E-Commerce App | Node.js, Express.js, React.js, MongoDB, Gemini API Oct 2024

Created a full-stack e-commerce platform with product listings, cart management, and checkout.

Integrated Gemini API for smart product recommendations and improved search. Built secure REST APIs with Mongoose schemas for user auth, orders, and inventory. Implemented user sessions and JWT-based authentication.

Git hub repository - github.com/Saks34/Ecommerce

CERTIFICATES

- Data Structures Algorithms - Self Paced | GeeksforGeeks June 2024
- Data Structures and Algorithms | Udemy June 2023

TECHNICAL SKILLS

- **Languages:** Java, JavaScript
- **Core Subjects:** Data Structures and Algorithms, Object Oriented Programming, Operating System, Computer Networks, Database Management System
- **Developer Tools:** VS Code, Git, GitHub, Postman, Version Control
- **Technologies/Frameworks:** HTML, CSS, ReactJS, NodeJS, Redux, Express, MongoDB

EDUCATION

Lovely Professional University, Punjab

Bachelor of Technology in Computer Science

Phagwara, Punjab

Sept 2022 - July 2026

DAV Public School, Raniganj

CBSE XII (Senior Secondary)

Raniganj, West Bengal

April 2021 - May 2022
